Says Geologist; Data on South's Greatest Phenomenon, Vitalitas.

nomenon, Vitalitas.

One of the most interesting subsets of scientific research that teologists have ever had to work upon a Texas is the Vitalitas deposit found apon a small tract of rugged ground. So far as known such a phenomenon soes not exist elsewhere on earth. This is the report one scientist has made regarding the deposit.

Vitalitas is the remains of a certain moulton lava or conglomerated mass that was malted in the bowels of the earth by the terrific internal fires. It was malted up through seams and crevices of rocks and peured from the crare of an active volcano that existed millions of years und. This was gradually solidified and the rosult is the peculiar substance called Whilitas.

So much is theory. But there is no theorising regarding the energised liquid that is extracted from this volcanic hava. It is rich in a remarkable combination of mineral chemicals and forces of nature. No one of the earth's matural mineral waters can compare with it, in tonic and corrective offects. A display of Vitalitas is soon to be made in this city and the place of holding it will be announced in the next few days.—Advertisement.

I TAKES 20 years for a mother to make a man of her sen, and 29 for another woman to make a feel of him.—Prof Simp.

The hero moved sprucily in from the right and stepping half way across the slare, stopping behind four little imitation rose buds.

If she does not come in half an hour she will be late, he said to himselm, yet iond enough for the audience to overhear.

At that mement someone entered from the rear.

Luche? No, it is the villian, and in his band he is carrying a gleaning dagger that seems to have quite a point on the end. He kneels warfly behind a little clump of blue ribbons. She comes? exhited the hero, and lacile stepped radiantly onto the stags from the left and disappeared behind a square buckle covered with thinestones.

"Lincile," cried the hero.

"Lincile," cried the hero.

"Lincile," cried the hero.

"Lincile," cried the hero and fell into each other arms.

But who is this? It is the villian, still accompanied by the dagger. For a instant a silightly larger sprig of rosebuds hides him from view, then he stabs the hero and drags lucils off behind the rhinesions buckle as Gadaworth drops into a rather handsome algrette.

To make a mystifying story clear, the writer witnessed the scene behind a formed person who didn't feel like romoving ber hat.
